

# COSYSPA HOT TUB ALKALINITY INCREASER

## INSTRUCTIONS

1. Check the water on a weekly basis with a quality test kit and ensure the Total Alkalinity reading is above 80ppm. If the reading is below 80ppm, and to raise the Total Alkalinity reading in 10ppm increments, add 30g of Spa Alkalinity Increaser per 1000lts of water and add directly to the water (with circulation running).
2. Re-test the water to ensure you have attained the desired reading.
3. Only add Spa Alkalinity Increaser in stages and always re-test after additions.

## PRECAUTIONS

- Always ensure bathers are out of the water when adding chemicals.
- Never mix with any other chemicals including cleaning products, weed killers and chlorine products, as a dangerous reaction may occur.
- Always handle products in a well-ventilated area.
- Always wash hands thoroughly after handling chemicals.
- Store in a cool, dry well ventilated, secure place. Ensure chemicals do not become damp in storage.
- Instructions and dosages given are a guide to the most effective use.

## WARNINGS

- This container must not be used or contaminated with any other materials.
